-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Amendment filed on August 17, 2005 has been entered.
2. Claims 1,3-4,7-27 are presented for examination.

Response to Arguments

3. Applicant's arguments with respect to claims 1,3-4,7-27 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

- The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).
5. Claims 13-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Iwata (U.S. Patent No. 6,947,315).

a device (Figure 53) comprising a magnetic random access memory array (223), and a first storage circuit (222) distinct from the MRAM array and comprising one or more magnetic elements (224), wherein the first storage circuit is configured to store within the magnetic elements parameter settings characterizing applications of current to operate magnetic random access memory array (Column 32, lines 35-49), and wherein the parameter settings are settings selected for use by a customer of the device (Column 32, lines 40-55), and wherein the parameter settings are setting selected for testing qualitative features of the magnetic random access memory device (Column 1, lines 44-47), and further comprising a second storage circuit having one or more magnetic elements, wherein the second storage circuit is configured to send a control signal by which to select the first storage circuit or the alternative means to send the parameter settings to the magnetic random access memory array, and a circuitry configured to vary one or more values of the parameter settings during an operation of the magnetic random access memory array (Column 32, lines 20-67).

Allowable Subject Matter

6. Claims 1,3-4,7-12,19-27 are allowed.

Claims 1,3-4,7-12,19-27 include allowable subject matter since the prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed limitations. Iwata (U.S. Patent No. 6,947,315), and others, does not teach the claimed invention having a point in time at which current is applied to the one

or more conductive lines; and a length of time current is applied to the one or more conductive lines.
